**THERE IS NOTHING COMPACT ABOUT NORTH AMERICA. FORTUNATELY, THERE IS ABOUT OUR RIFLESCOPES.**

1-4 x 24 NXS™ Compact  
8.8 inches, 17 ounces

2.5-10 x 32 NXS™ Compact  
12 inches, 19 ounces

Hunting is tough enough without being burdened with a massive scope having more size than substance. Originally developed for the U.S. military, Nightforce NXS™ Compacts are light in weight, short in length, and long on features... outperforming many riflescopes twice as large. They're proof that size is no substitute for quality.

Our new IHR™ stands for International Hunting Reticle, with good reason. Illumination is standard.

## FIELD PHOTOGRAPHY TIP NO. 13

### GET CLOSE

For smaller antlered game and horned game, some of the best field photos come from getting right down on the ground close to the animal with their head positioned between you and the camera. Sometimes this is done out of necessity (note cliff in this photo), but often times even with the room to move around the tendency is to sit to the side, or in some cases in back of the animal. We call this B&C score enhancement poses. Unless you're 6' 5" and 265 pounds, you won't detract from the size of your trophy and being close is a great way to honor your animal.

### FIELD PHOTOGRAPHY TIP

John C. Hover took this Stone's sheep, scoring 171-3/8 points, while hunting near Ice Lakes, Yukon Territory, in 2012.

## RECENTLY ACCEPTED TROPHIES

While hunting in Carbon County, Wyoming, in 2012, Stacey L. Perrien harvested this pronghorn, scoring 81 points, with her .300 Win. Short Mag.
