For 50 years, developing, testing and evaluating gear has been the foundation of what we do at Cabela's. Making sure our products live up to your expectations is our most important job. And it has been for half a century.

I hunt in some of the most inhospitable terrain on the planet. The tough Microtex fabric combined with the concealing shades of gray that make up the Seclusion 3D Outfitter pattern have been an excellent combination for me.

FIELD PHOTOGRAPHY TIP NO. 4

SPONSORED BY

SWAROVSKI
OPTIK

The one-on-one quest of man versus prey and the elements are what we associate with hunting, but this is not always the case. Family and friends can and often do join in the action, especially if a young hunter is involved, the hunt takes place in rough country where there is safety in numbers, or the hunt may be with a very special tag in hand.

Highly coveted sheep tags and the hunts for mountain rams are where we most often see a group accompanying the tag holder. Some are there for an extra set of eyes behind optics, some to help render a field-judging opinion, some hoping to be part of the packing out chores, and some just wanting to tag

along on a rare opportunity to hunt sheep. For field photography on such hunts, there always comes a time where the call goes out for everyone to get into the picture, adding to the memories captured for posterity. Group photos can therefore present a composition challenge, but one that is easily overcome with a little extra effort.

Naturally, the ram should be the focal point. To answer the question for the observer who the hunter is, the tag holder should be the one closest to and holding the ram. Participants should then be evenly distributed around the ram and the hunter, with as much equal billing as possible. Typically lost in these group shoots is any background of the location from trying to make room in the frame for everyone. The above example has it all, including smiling faces, and is a good reference when setting up a field photo for a hunt accomplished by committee.

This desert sheep was taken by Michael A. Davis in 2010 while hunting in Culberson County, Texas.

MUSK OX ABOVE Larry A. Meyer took this musk ox in 2010 in Kugluktuk, Nunavut, with a score of 128-2/8 points. **BIGHORN SHEEP BELOW** This bighorn sheep was harvested in Cadomin, Alberta, during the 2009 season by Shelly Sayer. The ram scores 191-2/8 points.
