

NEW GUNS AND GEAR

1. KIMBER® MOUNTAIN RIFLES

A true mountain rifle must be light and accurate, and hardcore hunters understand this. Kimber's line of mountain rifles are the lightest production big game rifles ever offered, delivering legendary Kimber accuracy yet weighing as little as 4 pounds, 13 ounces. Kimber mountain rifle stocks are reinforced carbon fiber for strength and the stainless steel barreled actions shrug the elements. These rifles have no equal.

Kimber Montana™ rifles combine all the best Kimber features in a lightweight, stainless steel and reinforced carbon fiber package that guarantees performance. Actions offer controlled round feeding plus a 3-position wing safety and are bedded on pillars and at the recoil lug for strength. Match grade barrels, chambers, and triggers ensure accuracy.

Kimber Adirondack™ and Mountain Ascent™ models go even farther. With a 16 or 18-inch threaded barrel, spiral fluted bolt body and hollow bolt knob, the Adirondack is compact and fast. The Mountain Ascent has additional custom features, including a fluted and threaded barrel and muzzle break. Both wear Gore™ Optifade™ concealment patterns so they blend into almost any environment.

Kimber mountain rifles are available in over 15 different calibers.

2. SIG SAUER ZULU7 BINOCULARS- 10X42

This premium, open-hinged short-to-long range roof prism ZULU7 lightweight binocular utilizes our industry leading HDX™ optical design that combines extra-low dispersion glass with high light transmittance glass to provide you with the maximum in color, image brightness, and absolute clarity. An image that is truly stunning to behold.

Features at a glance:

- The fully multi-coated ZULU7 roof prism binocular incorporates SHR (Super High Reflection) phase-coated BAK4 prisms for unmatched resolution and image contrast with generous eye relief through multi-position twist-up eyecups
- This versatile binocular offers a maximized FOV through the 8x model, and for wide open spaces where distance is a factor, the 10x model provides the perfect magnification level
- Durable rubber armor further protects the ZULU7, while also providing a non-slip grip with or without gloves on
- The multi-position twist-up eyecups provide a custom fit for each user
- Dependable waterproof (IPX-7 rated for complete water immersion up to 1 meter) and fog-proof performance
- The ZULU7 binocular is tripod-compatible and also includes tethered objective lens covers, a deluxe neck /shoulder strap, lens cloth, and a premium padded ballistic nylon case
- 15x56mm HDX Includes tri-pod adapter

3. SILVER STAG KNIVES

The SILVER STAG manufacturing facility is something you might have seen in America 100 years ago. A small group of guys, hand making high quality tools in a dusty old pole building, in small town USA. Every knife produced (under their rusty old roof), is ground, shaped, assembled, polished, and sharpened free-hand. These skilled craftsmen exclusively use domestically produced High Carbon Tool steels to manufacture their blades, and then incorporate antler or hardwoods into their finished designs. Since each knife is handmade using natural materials, no two SILVER STAG knives will ever look exactly the same. But you can be assured; these knives are exceptionally practical, durable, and gorgeous to behold. The team at SILVER STAG will even manufacture a knife using their customers own cherished antler. Over the years, SILVER STAG has received many industry awards; including NRA NWTF, RMEF, and KING Ranch Knife of the year programs. SILVER STAG has also teamed up with RUGER, and Cabela's to build exclusive designs.
