MORE TO THE SCORE

Holy webbing! You could eat a steak dinner off of those main beams. This mid-November typical whitetail had circumference measurements of five, six and seven inches, according to the score sheet in Big Game Records LIVE. In the woods of eastern Alberta, Paul Villeneuve was taking his .30-06 for a walk when this absolute monster walked in front of him at a mere 30 yards. It's likely this buck's webbing was a genetic trait passed down from generations. And thanks to those genes, this buck is now the fifth typical buck overall from Alberta. The province hasn't seen a record-book typical whitetail that big in nearly 30 years.

B&C SCORE: 192-6/8 Points
LOCATION: Seibert Lake, Alberta
YEAR TAKEN: 2020
HUNTER: Paul M. Villeneuve
