# B&C VINTAGE HUNTING GALLERY

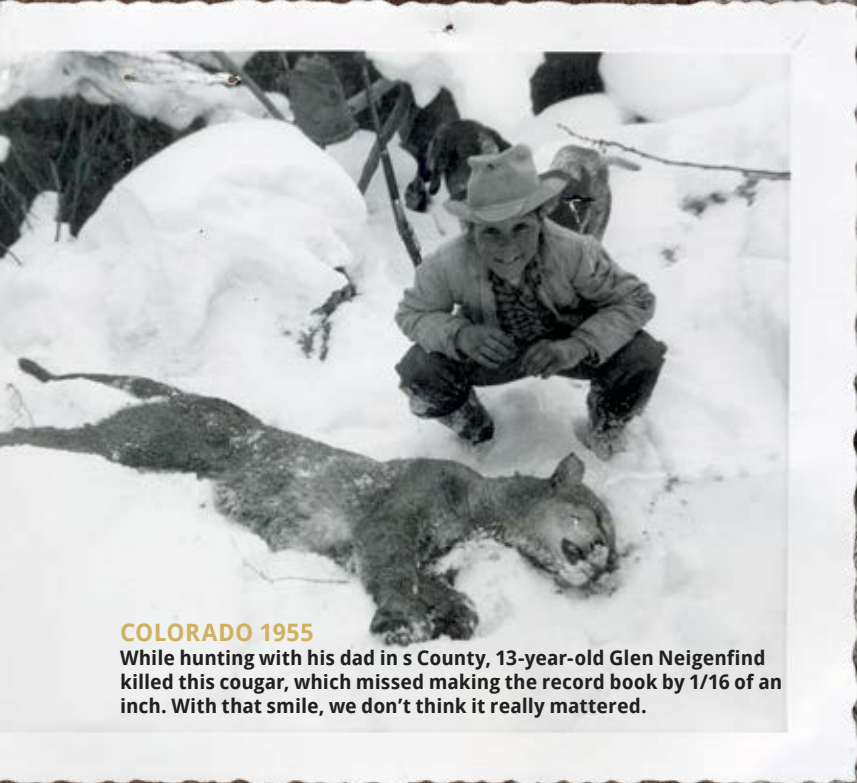

Old hunting photos are a special window into a bygone era. Take a peek into B&C's vast archive of historic images.

## FROM TODDLERS TO TINES

The only thing better than sharing the spoils of the hunt with your kids is having them hunt themselves. Passing down the fun of the hunt is a time-honored tradition for many families—and as you can see from these photos, it's been going on for quite a while.

### OREGON 1938

She may only be six years old, but Charlotte Dunsmoor Wall knows a solid Roosevelt's elk when she sees one. This bull was taken near Astoria by her father Oliver Dunsmoor. Its score of 363-1/8 puts it at number 10 for Oregon and 32nd of all-time.

### COLORADO 1955

While hunting with his dad in s County, 13-year-old Glen Neigenfind killed this cougar, which missed making the record book by 1/16 of an inch. With that smile, we don't think it really mattered.

### ARIZONA 1949

Draped over a 1936 Chevy, this typical mule deer was William H. Geare's first buck. He killed that deer with a .30-30 Winchester Model 94. It might be tough to see, but that south Kaibab deer went on to score 192-3/8.

**QUEBEC 1962**

Stanley B. Fredenburgh Jr. traveled from New York to Turcotte Lake at 16. There, he took this great Canada moose, which scores 202-2/8 points.

**ABOVE - ALASKA 1956**

Near Frazer Lake on Kodiak Island, Keith Chisholm was only 11 years old when he shot this beast of an Alaska brown bear. The bear scores 29-7/16 points.

**RIGHT - ALASKA 1953**

The kids weren't hunting with Ray Al Winchester when he took this barren ground caribou while hunting solo in southern Alaska. They were glad to see him when he came back, though. The rack scores 440-7/8 points.

**OREGON 1955**

In the fall of 1955, Gene Tinker took his lever action for a walk and connected with this Columbia blacktail near Pleasant Hill in Lane County, Oregon. The typical rack scores 139-4/8 points.
